MEMORANDUM

TO : OIC, Assistant Schools Division Superintendent
Education Program Supervisors/Public School District Supervisors
Public Elementary and Secondary School Principals

"IWAS PAPUTOK" CAMPAIGN

Every yuletide season, accidents related to firecrackers are numerous. Children are very playful thus easily coaxed to buy readily available firecrackers. As a result, they are exposed or prone to its harmful effects. Studies show that fireworks can cause respiratory problems such as: chronic or allergic bronchitis, bronchial asthma, sinusitis, rhinitis, pneumonia and laryngitis.

In support of the government's "**Iwas Paputok**" campaign and to protect children from firecracker-related injuries and its harmful effects on health, you are advised to encourage the concerned Teachers to incorporate this in their lessons.

For strict compliance.

For:

EVANGELINE P. LADINES, CESO VI

Officer In-Charge
Office of the Schools Division Superintendent
