About the LEEP Training Program:

Learning Effectively Through Enhanced Pedagogies (LEEP) is K Channel's newest training program that was developed by Dr. Fe Hidalgo, former OIC Secretary of DepEd. LEEP was designed to ensure that teaching approaches, teaching technologies, and teaching environments result in effective learning—where learners are active participants in their own learning and where growth in learning is continuous.

The training is aimed to help teachers gain relevant skills that will update their knowledge and increase their effectiveness in the classrooms, and also to workshop principals in educational leadership and effective differentiated supervision. It also brings together the different stakeholders of education in each community.

The LEEP program aims to train teachers and principals in the application of the new K to 12 curriculum in the classroom while using K Channel materials. With the LEEP training program, schools are provided with a hard drive that has K Channel content, such as videos, games, and session guides.
