NERISSA L. LOSARIA, CESO VI
Officer In-Charge

Office of the Schools Division Superintendent

11 March 2015

Nerissa L. Losaria
Office-in-Charge,
Office of the Schools Division Superintendent
Department of Education
Division of Mandaluyong

Invitation to the Microsoft - British Council Deep Learning Series

Dear Ms Losaria,

Microsoft and British Council are working in partnership to deliver a series of policy dialogues in East Asia countries, targeted at leading education policymakers and practitioners. Running from August 2014 to December 2015, the series also includes an event linked to the Education World Forum 2015 in London.

We wish to invite two of your Division supervisors and 10 teachers from different elementary and secondary schools in Mandaluyong to the Philippine leg of the Deep Learning Series. The focus of this series is on Global Citizenship, ICT in Education, and Collaboration Skills and as such we request that representatives to be sent are those in charge of or has specialization in these areas and are engaged in the K-12 process. We feel that the activity will be a good opportunity for the Department of Education to share and gather insights on embedding deep learning skills or 21st century skills in the schools.

The basic information on the Philippine event is as follows:

Date: 26 & 27 March 2015
Venue: Marco Polo Hotel, Ortigas Centre, Pasig City
Title: Deep Learning Series Philippines
Topics: Global Citizenship, ICT for Learning and Collaboration
Abstract: In a globalised, knowledge-based and technology-driven world, the surest route to long term success for young people lies in their capacity to generate and implement new ideas. For education systems this means evolving teaching methods to help students gain the capabilities they need to become creators and innovators. It is essential for the future of our societies that all young people have the opportunity to develop in this way, not just those who go on to university. Recognising this, the dialogue series brings together Microsoft's world class reputation in using ICT in learning process, as well as British Council's experience and expertise in working with schools and English learning to support global citizenship. ASEAN Deep Learning Policy Series gathers policy makers and practitioners from the UK and East Asia for policy and practices discussion and debate focusing on Deep Learning Skills. The general purpose of the dialogue is to exchange knowledge and share information concerning education at school. It also aims to provide platform for collaborations among policy makers and practitioners. We hope the results will lead to improve educational opportunities and improvements for the region.

Attached is the programme and a brief description on Deep Learning for your reference.

We truly hope that you could participate in this activity. We will appreciate if we can receive your confirmation by 18 March 2015.

Please do not hesitate to contact us if you have any further enquiries.

Sincerely,

Lotus Moreno Postrado
Head of Education
British Council, Philippines
